

ST-50

Smart table with universal design

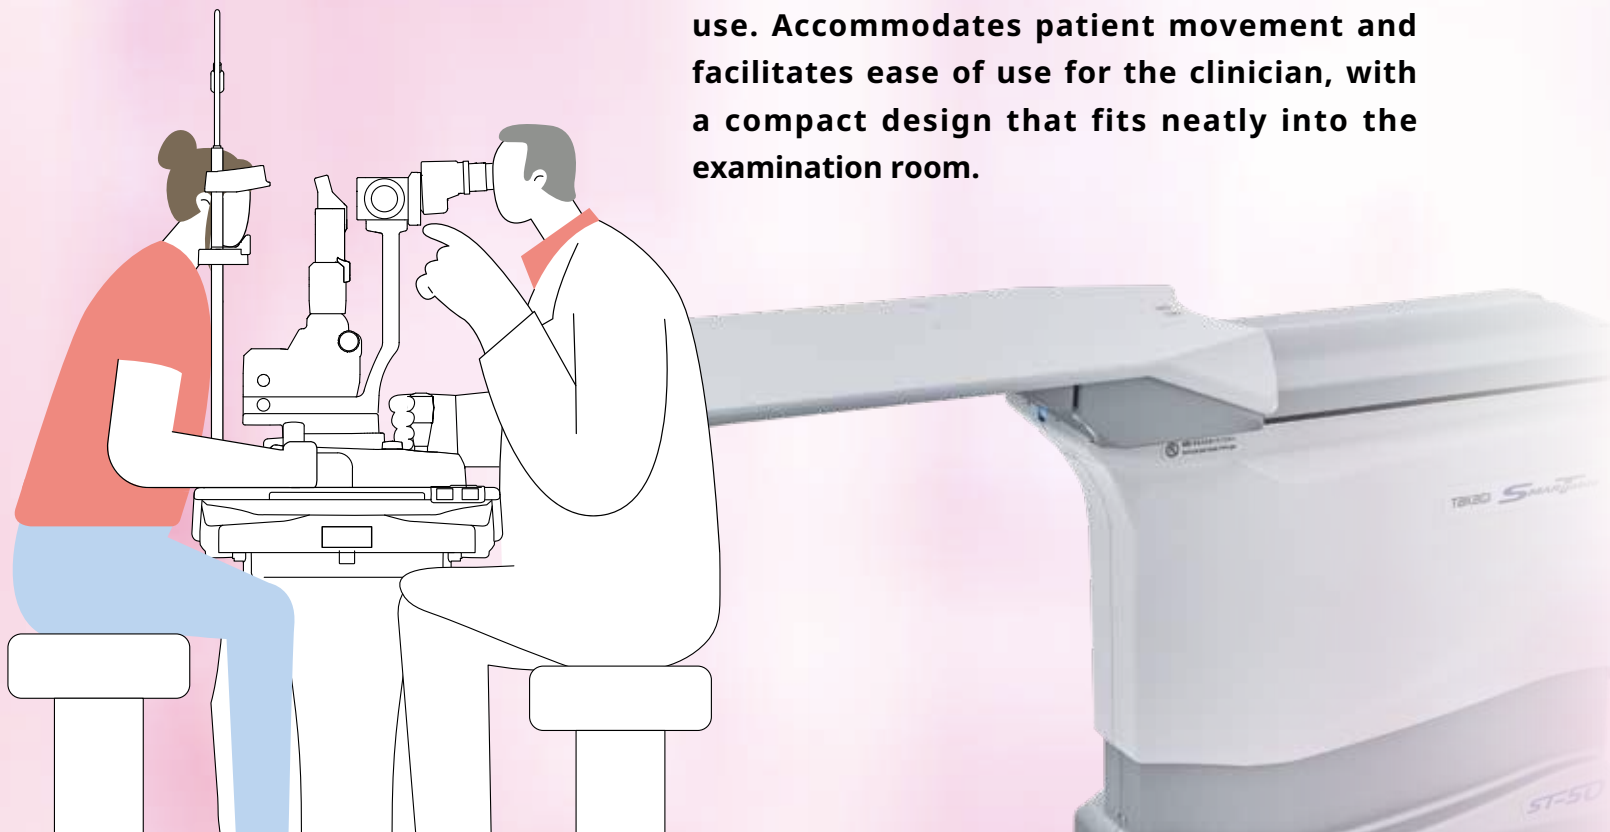

- Comfortable for both doctors and patients
- Flexible operation supports smooth examinations
- Space-saving smart design

Serving Your Vision

TAKAGI ophthalmic devices, proudly made in Japan since 1955.

A smart table designed for easy slit lamp use. Accommodates patient movement and facilitates ease of use for the clinician, with a compact design that fits neatly into the examination room.

Easy operation for smooth alignment of the slit lamp and patient

Flexible operation and a design suited to various examination scenarios help improve operability during examinations.

Auto slide / manual slide

Automatic or manual slide methods can be selected depending on the examination situation and patient condition.

Chair elevation switch

The table provides power and vertical movement control for the patient chair, supporting a smooth clinical workflow.

*Compatible model: CR-750S Motorized Patient Chair and UN-21 Full Reclining Chair.
*CR-750S comes standard with a cable. Please see the Accessories on the back page for UN-21 cable.

Elevation stroke

With a minimum height of 620 mm and a maximum height of 920 mm, the table accommodates examinations for patients with a wide range of body types.

Design optimized for clinical environments

Designed with consideration for the examination environment of both doctors and patients, contributing to a comfortable clinical setting.

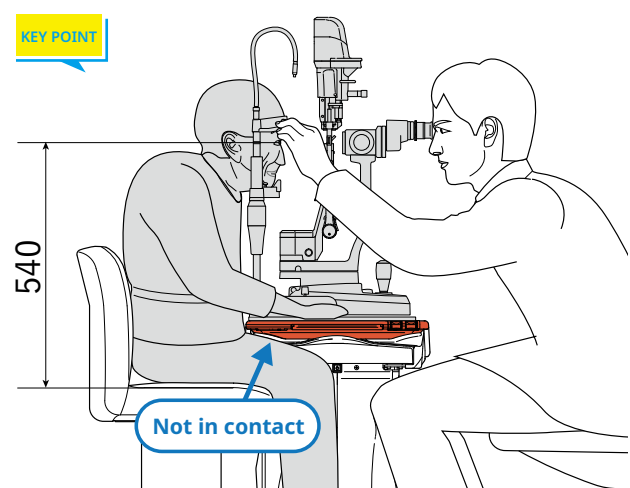

Safety switch

The underside of the table is fully covered to prevent exposure of mechanical components. The entire cover functions as a safety switch, helping to prevent pinching and accidental contact. It also helps prevent clothing from being stained by machine oil and supports cleanliness in the examination room.

Thin tabletop design

The thin design ensures ample space beneath the table, helping reduce the risk of contact with hands or thighs and contributing to reduced physical strain during examinations.

A smart design that complements clinic interiors

Designed to facilitate easy placement of peripheral equipment, enabling efficient layout configuration.

Slit lamp installation kits

Supports installation of slit lamps from various manufacturers, allowing flexible setup options.

*Please contact our sales department for full details.

Easy-to-organize design

The sliding tabletop and cable outlets support efficient arrangement of peripheral equipment and help maintain an organized clinical space.

Combination with UN-21 Full Reclining Chair

In medical environments requiring large and/or reclining patient chairs, the UN-21 Full Reclining Chair can be connected to the table.

*Please see the Accessories on the back page for UN-21 cable.
